

MOVER MAG

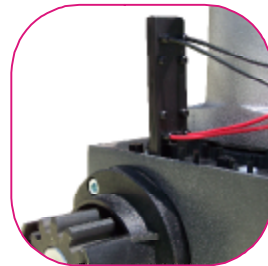

THE NEW FAMILY OF SLIDING MOTORS WITH MAGNETIC LIMIT SWITCH SYSTEM

MOVER MAG is the new entry in Proteco range of automations for sliding gates. The new gearmotor has a **magnetic limit switch detector**, invisibly fixed inside the cover and already connected to the control panel. **Elegant** and user-friendly thanks to the absence of mechanical limit switches, makes the installation procedure easy and quick.

NEW!

Together with MOVER MAG you can find **the new rack B112**, available with magnetic limit switches or with the usual mechanical brackets. **Light and silent**, completely in nylon, it comes in 20cm bars M4 module, assuring long lasting performances because it can't be affected by weather conditions or oxidation. **Quick and easy installation** with self-fitting bars that keep the pitch unchanged. MOVER MAG is available in any version with **230V power supply**.

MOD	GATE'S WEIGHT	CONTROL PANEL	RACK
MOVER MAG 5	500 Kg	Q60S	B112
MOVER MAG 8	800 Kg	Q60S	B112
MOVER MAG 15	1500 Kg	Q60S	B112
