

## Instruction for creating a new language:

- 1) Open Translate\_Tool.exe
- 2) Click on "Add New Language" button:

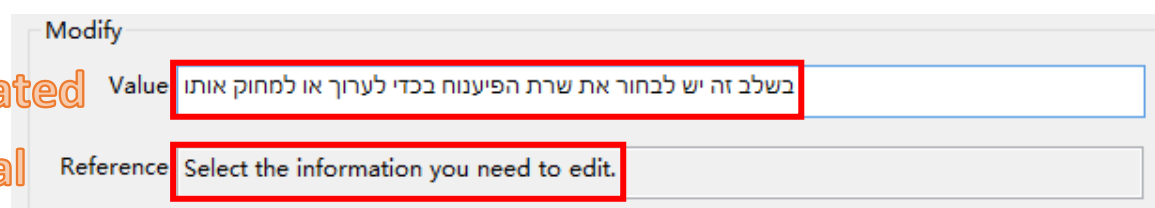

- 3) After doing so a new window will open for choosing the new language you wish to add:

- 4) Chose the desired language from the drop down menu and Click "Add"
- 5) A new window will open containing all the lines for translation.
- 6) In the new window, click on the first line
- 7) Input the correct translation in the "Value" Field
- 8) Press "Enter" to save the line value
- 9) Make sure that the Value line in the table is being changed from blank to the correct value.
- 10) Do your best not to exceed the original length of the line as it may corrupt the way it will appear in the interface. for example:

The translated line is longer than the original – This can cause problems in the interface (Such skipping lines, text disappearing behind other text Etc.)

Translated  
Original

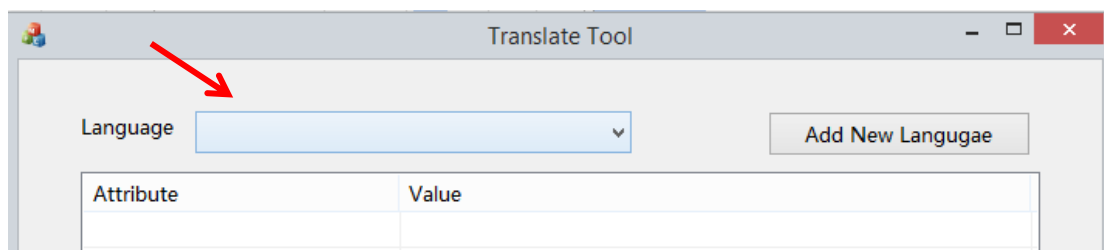

- 11) Press “down arrow” on the keyboard or click on the next line with your mouse to move to the next line.
- 12) Give special attention to fields containing “%” as they must stay in the same format as the original line.
- 13) After finishing you must press “Save” in order to create the new file and add it to the index

The screenshot shows the 'Teanslate Hebrew (Israel)' window. The 'Modify' dialog is open, with the 'Value' field containing 'Input the value and press “Enter”'. A red arrow labeled '2' points to this field. The 'Reference' field is set to 'Create Area' and the 'Attribute' field is set to 'IDCS\_ADD\_AREA'. A red arrow labeled '1' points to the 'Attribute' field. The 'Select Reference Language' dropdown is set to 'English (United States)'. A red arrow labeled '3' points to the 'Save' button at the bottom right. Below the dialog is a table with the following data:

## Editing/Continuing work on language file:

- 1) Open Translate\_Tool.exe
- 2) Choose the language you wish to edit from "Language"

- 3) Click on Modify, the editing window will open.

- 4) Continue the translation process.
- 5) Press "Save" after finishing.

## Sending the Language file to Provision-ISR

- 1) Compress all Folders which appear in the translation folder into a ".ZIP" / ".RAR" file.
- 2) Rename the new file to the new language name
- 3) Send to Provision-ISR the compressed file
- 4) Provision-ISR team will test the file for missing lines and confirm it. If there are any problems we will send you back the file for additional work
