

MAGNETIC CONTACTS

Satel®

Magnetic contacts incorporate a perfectly reliable magnetic switch for high parameter stability and repeatability.

Magnetic contacts are manufactured in two series: K and S. The S series is equipped with an additional tamper loop.

Detector types differ in their mounting configuration and housing.

- **K/S-1**
 - plastic housing
 - surface mounted by means of adhesive tape or screws
- **K/S-2**
 - plastic housing
 - press fit mounted
- **K/S-3**
 - metal housing
 - screwed into the window/door frame
- **S-4**
 - plastic housing
 - surface mounted by means of screws
 - connection of wires inside housing
 - double tamper protection
 - 2EOL configuration compatible
