

RCP Master 4 Web is an additional module for the RCP Master 4 system, which enables employees to access selected functions of the RCP system via a web browser. The employee using RCP Master 4 Web can perform many activities on their own without the need to communicate with the HR department, in particular, check the current state of the worked time, view the event log, submit a holiday request or report other types of absence.

The RCP Master 4 Web module enables remote work registration. The RCP Master 4 Web application provides also a set of functions intended for superiors of various levels (managers, foremen, team leaders, etc.), who thus gain a quick and convenient way of work time and attendance overview within the managed employees group.

Features:

- overview of the working time
- remote registration of T&A events
- employee work history
- registration of remote work
- submitting holiday requests and other types of absence
- verifying of the holiday usage
- displaying the current status of the attendance of employees (present, absent, on a business trip, etc.)
- graphical visualization of employee attendance (attendance list)
