ABOUT ADVANCIS

Since 1994 Advancis provides the security, safety and building management industry with its highly flexible and open architecture command & control system, WinGuard PSIM.

Advancis is committed to open architecture and vendor neutrality since its foundation. Our command & control technologies provide clients with freedom of choice and the ability to unify disparate system brands of all types into a single management application that offers enhanced security and greater system efficiency. WinGuard also reduces operational costs and provides a rapid return on investment.

Advancis is a constant innovator with regular product improvements and developments for the global PSIM market.

TECHNOLOGY PARTNER PROGRAM

We work in close partnership with an ever growing community of technology partners around the world, with currently over 400 integrations to best of breed vendors.

With this close cooperation we can achieve a deep integration of our technology partners' systems and a comprehensive functional scope. Regular communications and meetings with the partners technical personnel ensures that our driver interfaces are always state of the art.

Advancis employs highly skilled and qualified employees who provide excellent support to fulfill the ongoing needs of our joint customers. Our joint value solution with partners generates greater market awareness and cross selling potential.

PREMIUM PARTNER - ROGER

Roger was established in 1991. Its area of activity is designing and manufacturing of security electronic devices, especially in the field of physical access control.

Roger offers wired and wireless physical access control, time & attendance, building automation, key management and mobile identification solutions.

Thanks to long experience Roger products present a high functionality and stylistic level while maintaining high reliability. Roger systems improve lives of people around the world offering advanced and secure solutions.

“

For 20 years, Roger has been specializing in the design and production of access control and building automation solutions offered as part of the RACS system. This system is designed for a wide range of applications and can be successfully used both in small and large facilities. The RACS system offers a high level of functionality and the possibility of integration with other systems from the security industry and building management systems. The integration with the Advancis PSIM platform strengthens the position of the RACS system in business applications, offering building users new possibilities in the field of comprehensive security management.

”

GRZEGORZ WENSKER
CEO, Roger

JOINT SOLUTION

The WinGuard PSIM platform fully integrates the RACS access control system. All actions are logged in the WinGuard event archive for evaluation purposes, providing a comprehensive and reliable building security solution.

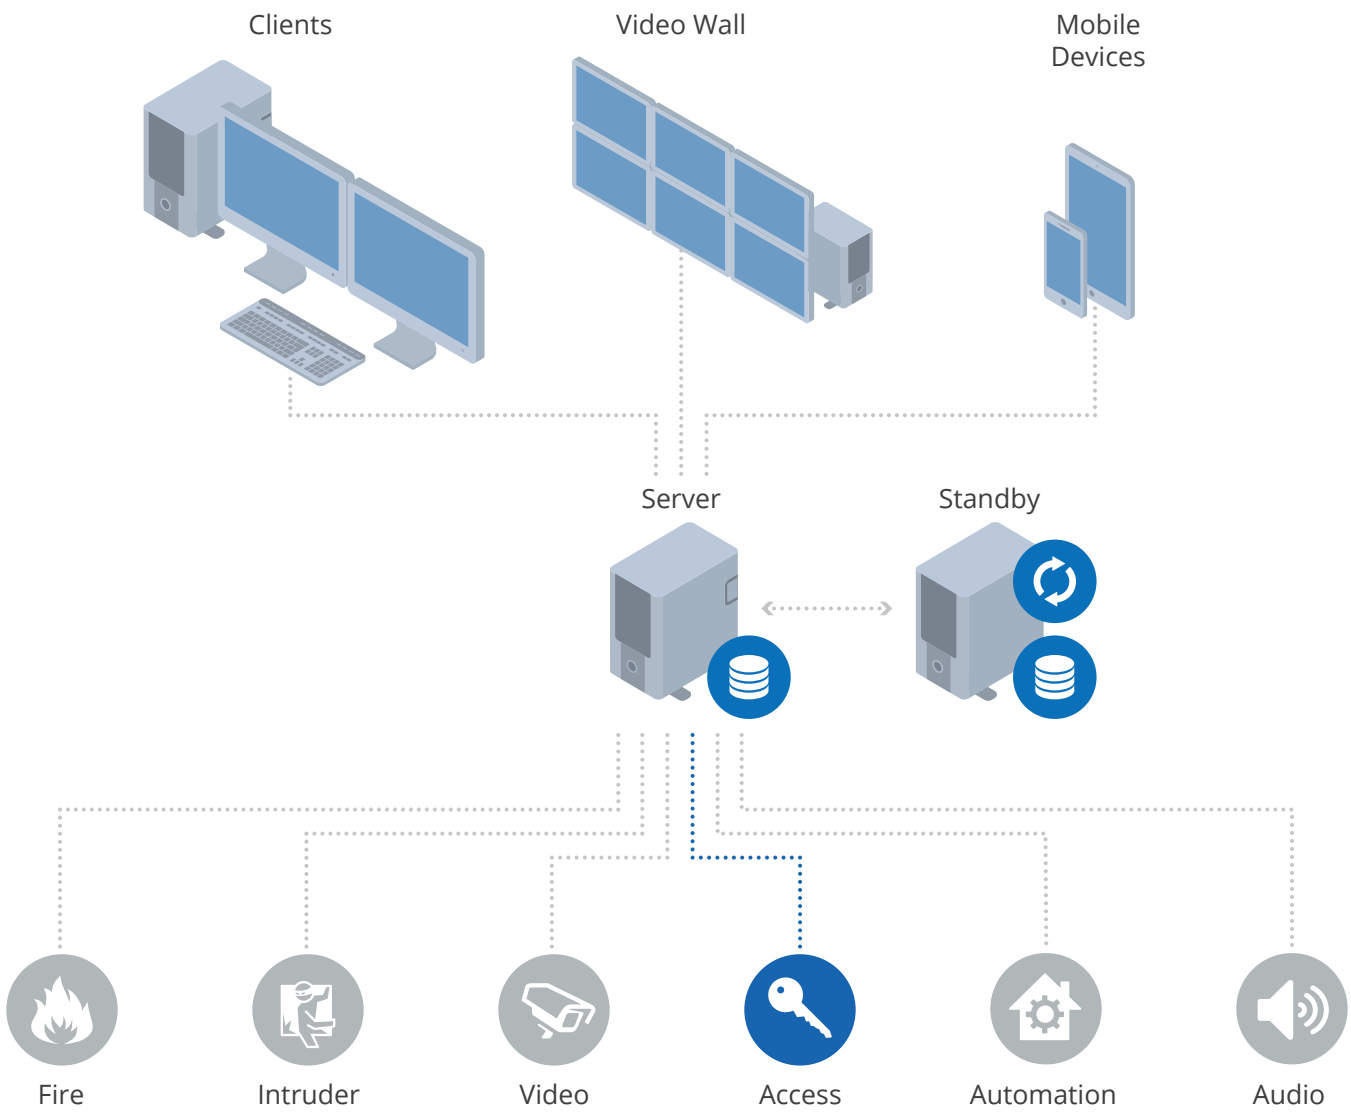

- ✓ Open platform solution for complete infrastructure integration and management
- ✓ Flexible user interfaces that adapt to customer requirements
- ✓ Guided process instructions support the user in event processing
- ✓ Reports offer a quick overview of relevant key information
- ✓ Mobile apps provide insight to all incidents and operations at any time
- ✓ Scalability from a single workstation to multiple control centres with redundancy and failover
