

### Product advantages

## 2012 News

- Led device that does not need any maintenance
- It replaces normal filament bulbs inside the already-installed flashing lights
- It is suitable for all types of flashing lights thanks to multi-voltage technology
- Easy installation thanks to a screw connector for using ML6 on common couplings of E14 bulbs
- Its extractable terminal board prevents cable twisting during product installation phases

Public price\*:  
30 euro

### Technical features

Power supply	24 ÷ 300Vdc 24 ÷ 230Vac 50/60Hz
Intermittence	automatic
Max working cycle	80%
Working temperature	-20 ÷ +60 °C
Dimensions	74 x 32 x 30 mm
