## Educational video library

Watch the different tutorials for each product series.

Glad to inform you that a V2 Educational Video Library is already available on YouTube in EN language. For every single product model, different tutorials explain each installation steps, as per the manual progression: just open the video "description" and select the link of your interest.

Despite the amateur quality, we believe they can be useful for clarifying various installation issues and recurring themes such as: "how do you memorize the remote controls on the slide?".

Below the links to the first product video. Thanks for watching and sharing.

### Product models
