

- Indoor installation
- Sheet steel construction
- Vandal resistant polycarbonate glass
- Epoxy painted
- Key lock or with vandal resistant screw

AVTPSA

AVTPSAM

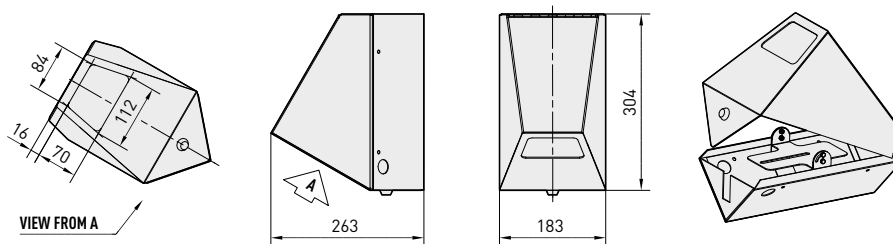

AVTPSA housings have been designed for surveillance applications in places highly exposed to vandalism (underground parking lots, subway stations, prisons, police stations, corridors, supermarkets, etc).

Two versions are available: AVTPSA corner housing and AVTPSAM mini corner housing. All models are made of sheet steel (3mm thick) and painted with epoxy polyester powder.

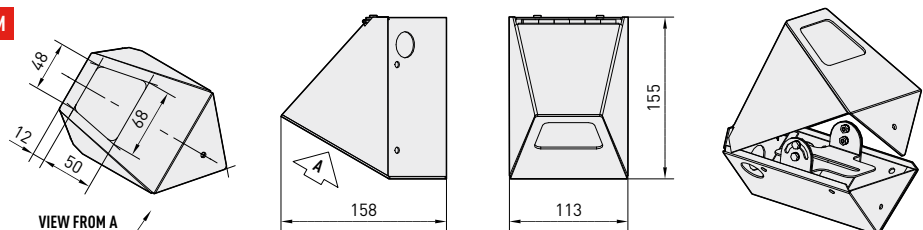

They are equipped with an internal bracket for the camera attachment and adjustment. The compass opening allows ease installation and maintenance. The AVTPSA is key locked instead the AVTPSAM mini-housing is supplied with vandal resistant screw lock.

A vandal resistant polycarbonate glass is fixed on the front by means of an iron frame. The cable outlet is made possible on the fixing side.
