TELEMETRY

The telemetry receiver range includes products with minimal features up to the most complex which satisfy any installation requirement. The digital receivers allow the control of P&T and motorized zoom lenses up 1200m (3937ft) away, by a twisted pair cable. In case of using the DTRX3 receiver or the DTMRX2 along with the DTCOAX optional card, a coax cable, used for the video signal, can also be used for data transmission together with Videotec matrix.

DTRX3	183
DTMRX2	187
MICRODEC485	189
DTRXDC	191
DTWRX	193
DCRE485	195
