

## Symmetric electric strike without memory and lock, latch adjustment, low current coil, 280mA for 12VDC

Marka: **ORNO Home** | Symbol: **OR-EZ-4046** | Ean: **5908254851469**

### PRODUCT DESCRIPTION

Symmetric electric strike adapted to both door opening directions (right/left). An adjustable latch allows to set up electric strike to various doors and frames.

The product requires a continuous voltage supply to hold the door open. When the tension ceases, the strike automatically moves to the closed position.

The low-current coil has a low current consumption of 280mA at 12V DC and 250mA at 12V AC. The device operates over a wide supply voltage range between 10-24V AC/DC.

The electric strike works with doorphone and video doorphone systems.
