

INDIGO

Satel®

Glassbreak detector
with excellent sensitivity
and high resistance
to false alarms.
Outstanding detection
precision was attained
by means of the innovative
TwinFreq signal
processing technology.

INDIGO

Glassbreak detector

- glassbreak detection (also laminated and tempered glass)
- fluid regulation of sensitivity at use potentiometer
- test mode
- high resistance to false alarms
- supply voltage supervision
- low power consumption
- intended for indoor applications

Acoustical tester for glassbreak detectors

- simulates the sound of breaking glass
 - plate
 - laminated
 - tempered
- required for reliable locating and sensitivity setting of Indigo detectors
- operates with single 6F22 Alkaline battery
